二、报告目录及图表目录

摘要

With more than 10,000 manufacturers, China is the largest supplier of fashion bags in the world. The country accounts for about 25 percent of global supply in the line.

The appreciation of the yuan, higher material costs and rising labor expenses, however, are challenging the world's bag factory, trimming suppliers' profit margins and forcing them to raise prices.

In the face of these challenges, suppliers are trying to reduce their overall expenses by improving production efficiency and enhancing staff training. Most suppliers, however, will have no choice but to raise prices in the next 12 months.

This comprehensive report will help you: Identify manufacturers that are best positioned to meet your needs Review the newest products at the best prices Save time and money by pre-qualifying makers before your next sourcing trip And much more...
